

Year 5

Year 5 have been very busy this term. The children have been exploring the topic of volcanoes in geography and in their reading lessons! They have been investigating how volcanoes affect the lives of people on Hiemaey, by describing and explaining the key geographical features of the Westman Islands region of Iceland and the island of Hiemaey in particular. Whilst in Reading lessons, the children have been closely following Marcus's journey to escape Pompeii when Mount Vesuvius began to erupt!

English Highlights

We have been focusing on the graphic adaptation of Tom's Midnight Garden in our English lessons. The children have explored a range of writing features from poetry, diary entries to letters and even writing their very own script! Year 5 have produced some amazing work including some fantastic 3D gardens.

Super science

This term the year 5 have been looking at reversible and no reversible changes. Year 5 really enjoyed exploring how to inflate a disposable plastic glove using the gas produced by a mixture of bicarbonate of soda and white vinegar.
